

PROFESSIONAL SUMMARY

Computer Science graduate from FAST NUCES, Islamabad, specializing at the intersection of Full Stack Development and Artificial Intelligence. Architect of complete systems: from React frontends and Node.js backends to LLM-powered pipelines, multi-agent autonomous workflows, RAG architectures, and cloud-native serverless infrastructures on AWS.

EXPERIENCE

- Software Engineer

Ozone Sync Limited

 - Architecting AI automation pipelines and intelligent agent systems as a technical lead.
 - Delivering LLM workflow integrations, multi-agent AI systems, and cloud infrastructure for client products.
 - Leading full-stack architecture decisions and end-to-end software delivery lifecycle.

Apr 2026 – Present | Islamabad, PK
- Associate Software Engineer

SoftBuilds

 - Built scalable backend services and automated compliance pipelines for production enterprise systems.
 - Implemented automated monitoring, diagnostics, and resolution workflows.

Feb 2026 – Apr 2026 | Islamabad, PK
- Software Engineer Intern

SoftBuilds

 - Built core front-end features using React.js and REST API integrations.
 - Contributed to CI/CD-integrated deployment workflows.

Nov 2025 – Jan 2026 | Islamabad, PK
- SAP Developer Intern

Red Flag Consulting Group (SAP Partner)

 - Developed ABAP programs and built SAP Fiori/SAPUI5 interfaces.
 - Automated SAP application workflows within enterprise delivery pipelines.

Jun 2025 – Aug 2025 | Islamabad, PK

SELECTED PROJECTS

ProxyIQ

AWS Lambda · AppSync · Amplify · HIPAA

Architected a serverless healthcare supply chain platform. Designed encrypted workflows for Protected Health Information (PHI) and automated compliance gating in CI/CD pipelines via Vanta.

AI Voice Sales Agent

Voice AI · STT/TTS · LLM Reasoning

Built an autonomous conversational voice agent for sales calls. End-to-end voice pipeline: STT → LLM reasoning → TTS in real time with dynamic objection handling and CRM handoff.

Movie Creation Multi-Agent System

Multi-Agent Systems · Python · LLMs

Designed a collaborative multi-agent architecture with role-specific agents (Story, Scene, Dialogue, Assets) communicating through structured orchestration pipelines to fully automate movie creative workflows.

Automotive Ad Creative MLOps Pipeline

Kubernetes · MLflow · Airflow · Docker

Engineered an automated LLM-powered ad copy generator. Configured MLflow for model registry/experiment tracking, Airflow for scheduling, and Kubernetes + Prometheus + Grafana for production monitoring.

EDUCATION

BS in Computer Science

FAST NUCES

Islamabad, Pakistan
